Election/Restrictions

The following is in response to the election filed 3/6/03:

Applicant has canceled all previous claims and submitted new claims 48-63. Although applicant has elected Group I, claims 48-55, the restriction requirement mailed on 6/26/02 set forth Group I as containing now canceled claims 1-4, 17, 19-28 drawn to purine compounds/compositions, classified in class 536, subclass 27.21. Given that the new claims are drawn to two distinct inventions further restriction is required.

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 48-55, drawn to a method of enhancing delivery of deoxyribonucleosides, classified in class 514, subclass 45.
 - II. Claims 56-63, drawn to a method for treating or preventing radiation-induced cellular damage, classified in class 514, subclass 42.

The inventions are distinct, each from the other because of the following reasons:

I. Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions comprise The method of enhancing delivery of deoxyribonucleosides as set forth in Group I requires a divergent search and clearly represents a different effect from that of treating or preventing radiation induced cellular damage.

Art Unit: 1623

2. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.
